

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) A desk provided with a projector, wherein the projector is underneath a work surface on ~~arranged below~~ a top of the desk, and ~~lights outputted~~ light output from the projector ~~[[are]]~~ is reflected by a mirror and projected in front of the desk, and

wherein all of the light output from said projector passes from underneath the work surface and beyond a front of the top of the desk.

2. (original) The desk according to claim 1, wherein the mirror is an aspherical mirror.

3. (currently amended) The desk according to claim ~~[[1]]~~ 14, wherein a part of the desk is a transparent plate and the ~~lights outputted~~ light output from the projector ~~[[pass]]~~ passes through the transparent plate.

4. (currently amended) The desk according to claim 1, wherein the mirror also is underneath the work surface on ~~all of the lights outputted from the projector pass in front of~~ the top of the desk.

5. (currently amended) The desk according to claim ~~[[4]]~~ 1, wherein a part of the top of the desk is cut off.

6. (canceled)

7. (currently amended) The desk according to claim [[6]] 1, wherein the projector is movable ~~and arranged under the top of the desk.~~

8. (currently amended) The desk according to claim [[6]] 1, wherein the projector is rotatable ~~and arranged below the top of the desk.~~

9. (original) The desk according to claim 1, wherein the lights outputted from the projector are projected on a screen arranged in front of the desk.

10. (original) The desk according to claim 9, wherein the size of the picture projected on the screen is varied according to a set-up position of the screen.

11. (original) The desk according to claim 9, wherein a part of the picture projected on the screen is positioned below the top of the desk.

12. (original) The desk according to claim 9, wherein a computer that inputs information to be projected on the screen is provided.

13. (original) The desk according to claim 12, wherein an operator operates the computer to perform Computer-Aided Design.

14. (new) A desk provided with a projector,

wherein the projector is arranged below a top of the desk, and light output from the projector is reflected by a mirror and projected in front of the desk,

wherein the light output from the projector is projected on a screen arranged in front of the desk, and

wherein a part of a picture projected on the screen is positioned below the top of the desk.

15. (new) A desk comprising:

a body with a work surface, said work surface having a transparent part;

a mirror mounted in said body directly underneath said work surface;

a screen in front of said work surface;

a projector mounted in said body underneath said work surface and arranged so that light from said projector is reflected by said mirror and projected through said transparent part onto said screen.

16. (new) The desk of claim 15, wherein said body comprises rolling members for adjusting a distance between said screen and said work surface.
